

solar made simple

Ease of mind with an
Autarco total solar solution

autarco

Electricity bill savings,
guaranteed.

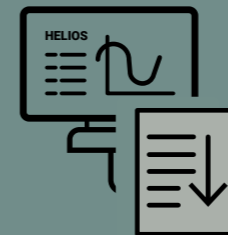

WITH KWH GUARANTEE

One brand, one complete PV solution

Purchasing a solar energy system can be quite complicated. Every component you need is offered by different brands. We do that differently. We're dealer of Autarco systems, the only solar PV brand with components that are developed in-house and work together seamlessly for the best performance possible.

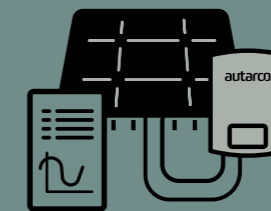

That's as unique as the kWh guarantee that insures the performance of your system. Is your system underperforming compared to the guaranteed yield? You will be compensated in cash for every missed kilowatt-hour, giving you peace of mind that your investment pays itself back.

autarco total solution

Design software

The Autarco system design software allows for highly precise and bankable calculations for your solar PV system. You'll receive a personalized offer with an accurate performance calculation.

Total PV system

The solar panels, inverters, cables, connectors and mounting systems are all from Autarco and work together seamlessly. Autarco develops everything in-house, fully integrating hardware and software for the best performance possible.

Asset management

After our installation the asset management is done by Autarco. We get notified when maintenance is required. Through the MyAutarco app you can keep track of your system's performance in real-time, wherever you are.

The benefits of Autarco

INSURED KWH GUARANTEE

The performance of all Autarco solar energy systems is insured through the kWh Guarantee Foundation and Lloyd's of London. That way you always have certainty, no matter what the future holds.

ONE BRAND FOR EVERYTHING SOLAR

Autarco develops everything in-house giving you ease of mind and your system the best performance possible thanks to seamlessly integrating components. You can keep track of your system's performance through the free MyAutarco app, giving you insight wherever you are.

DESIGNED IN THE NETHERLANDS

Autarco products are designed in the Netherlands. Our design philosophy results in beautiful and well performing products without any compromises.

High-end technology

SOLAR PERFORMANCE INSIGHTS WHENEVER AND WHEREVER

The MyAutarco app gives you access to your system's real-time performance. You can see exactly how many kilowatthours your solar panels generated today and how much you saved on your utility bill.

TIER-1 QUALITY

Our products are at the cutting edge of technological advancements in the solar industry. All components work together seamlessly giving you the best solar performance possible.

Lower degradation: Solar panels unfortunately degrade over time, reducing performance. This is often caused by corrosion, microcracks and solder bond failure. However, the innovative design of Autarco's solar panels significantly reduce the rate and impact of these failures.

High efficiency: Autarco uses the most powerful solar cell technology available. Autarco solar panels produce up to 30% more energy when compared to low efficiency panels on the market now.

Aesthetics: The best solar systems don't just perform well, they look great! Our design and quality teams go the extra mile to deliver the best looking solar system possible.

The kWh guarantee, explained

The performance of Autarco systems is insured through the kWh Guarantee Foundation in collaboration with insurance company Lloyd's of London. You will receive a cash compensation for every missed kilowatthour when the system underperforms.

Here's how it works.

- step 1** Your system is registered after installation with a 5, 10 or 15 year guarantee term. This insures you'll have a rock solid business case.
- step 2** After the registration is validated you'll receive a guarantee certificate from the kWh Guarantee Foundation. This has all of your PV system's details including the guaranteed yield.
- step 3** During the kWh guarantee term we pro-actively monitor your PV system and report on performance saving you valuable time. If necessary we'll be in touch if maintenance is required.
- step 4** You will receive a cash compensation for every missed kilowatthour should the system perform less than the guaranteed yield specified in your guarantee certificate.

RISK COMPARISON TABLE

	Product warranty	Panel performance guarantee	Insured kWh guarantee
Brand bankruptcy	✗	✗	✓
Performance loss due to product defect	✗	✗	✓
Performance loss due to lower insolation	✗	✗	✓
Performance loss due to installation defects	✗	✗	✓
Replacement product for product defect	✓	✗	✓
Replacement product when proven lowered solar panel output	✗	✓	✓
Financial compensation for system underperformance	✗	✗	✓

Work together on a better future for all

BE SUSTAINABLE AND BENEFIT FINANCIALLY

Put your roof to work. A customized Autarco solar solution with a guaranteed kWh energy performance assures effective cost savings and maximum independence from energy suppliers and rising electricity costs. Want to know what working together with us looks like?

DETAILED QUOTATION

Every roof is different. Based on your roof and personal preferences we can make an extensive shade analysis and system design. This is the foundation of our quotation which includes a financial calculation. You'll know exactly when your investment has paid itself back.

INSTALLATION

After you have made the safe decision to purchase an Autarco solution, your Authorized Dealer will plan a convenient installation date with you. Once the system is operating and monitoring is established your installer can register the system with the kWh Guarantee Foundation for final due diligence checks before receiving your guarantee certificate.

MONITORING

After installation we monitor your system's performance actively. You can also keep track of performance yourself through the free MyAutarco app and web portal. When we notice a drop in performance we will contact you immediately to discuss next steps, giving you peace of mind that your system is being looked after.
