

rock solid business case

The only solar PV system brand with
insured kWh performance guarantee.

autarco

‘I chose solar
without risk’

ALBERT LAMMERS

Insured; the best business case

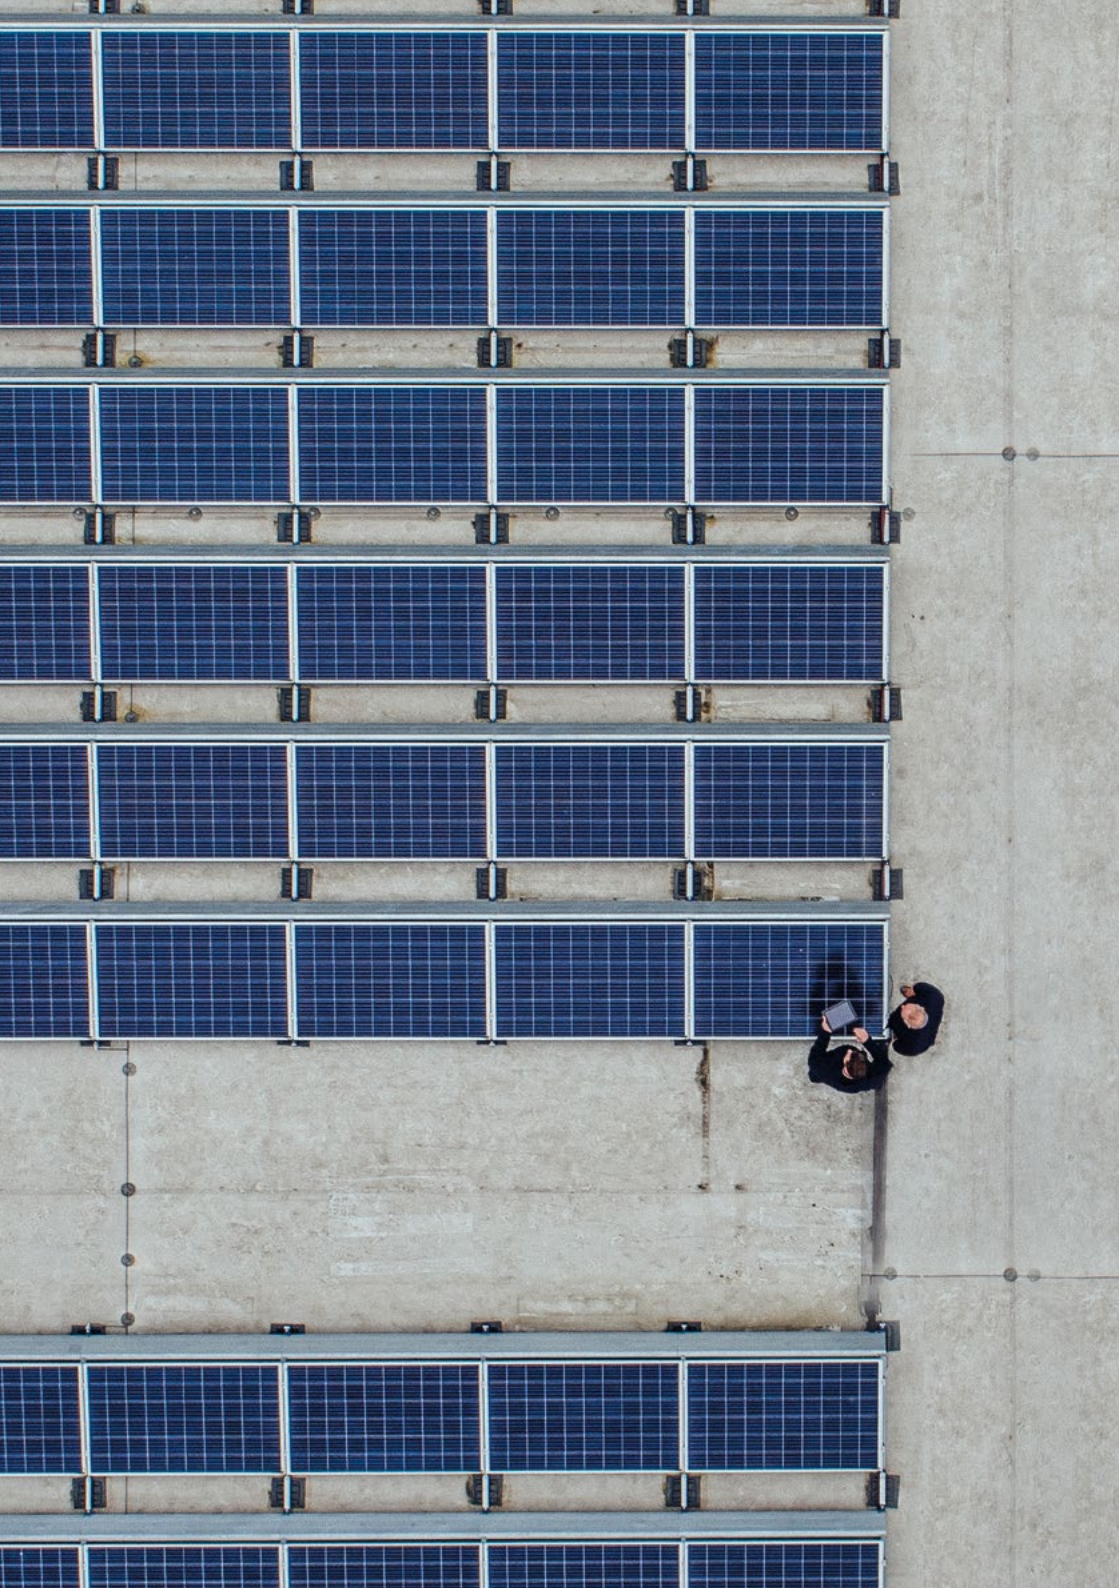

Autarco is a manufacturer of total solar PV solutions. Together with our network of Authorized Dealers we deliver simplicity and financial certainty to owners of our PV systems. While other PV systems are assembled using multiple component brands, Autarco develops all parts used in its solutions in-house. We've developed state-of-the-art software to deliver additional security and benefits to you and your Authorized Dealer of choice.

An investment in solar energy systems doesn't always yield the promised return. This risk is greatest when multiple component brands are assembled into a system for an owner who is not a solar expert. With an Autarco solar PV system, the risk of underperformance is removed from your business thanks to our insured kilowatt-hour (kWh) guarantee. If your system generates less energy than guaranteed, you receive the difference in cash.

The result is a rock solid business case.

autarco total solution

<p>Software</p> <p>Autarco has developed a software suite to completely manage the entire PV system lifecycle. Through the creation of a Digital Twin for your system it enables highly precise and bankable yield calculations whilst ensuring a safe system by design and during its operational phase.</p>	<p>Hardware</p> <p>The solar panels, inverters, cables, connectors and mounting systems are all from Autarco and work together seamlessly. Autarco develops everything in-house, fully integrating hardware and software for the best performance possible.</p>	<p>Asset management</p> <p>After installation Autarco's software will pro-actively monitor performance 24/7 and escalate when action is needed, so you can focus on your core business knowing your PV installation is safe and performing well. Through the MyAutarco app you can keep track of your system's performance in real-time, wherever you are.</p>

The benefits of Autarco

KWH GUARANTEE

The performance of all Autarco solar energy systems is guaranteed and if required insured at project level through Lloyd's of London. With Autarco you always have certainty about the future cashflows your investment delivers, no matter what the future holds.

VALUE FOR MONEY

Our commitment to producing quality Tier-1 products with the most advanced technology available ensures the lowest cost of energy is achieved over a system's 25 year+ life. Our reliability creates value for you.

ROCK SOLID BUSINESS CASE

With Autarco you invest in a bankable yield projection that is covered by a kWh guarantee. And with our premium O&M offering you not only have certainty about your future cashflows but your entire business case.

The kWh guarantee, explained

The kilowattour performance of Autarco systems is covered by a kWh guarantee, with optional premium coverage by Lloyd's of London, the world's largest insurer. If your system underperforms, you will receive a cash compensation for every missed kilowattour when the system underperforms. Here's how it works.

- step 1** Discuss the options with one of our Authorized Dealers to tailor your Autarco PV system to your exact needs. After installation, the dealer registers your system with us confirming the Digital Twin matches the as-built situation.
- step 2** After a due diligence on the install quality and analysis of inverter data you'll receive the kWh guarantee certificate for your formal approval. This has all of your solar system's details including the guaranteed yield.
- step 3** During the kWh guarantee term we pro-actively monitor your solar system, make sure the maintenance is performed regularly and when required and report on performance so you can rest assured and focus on your core business.
- step 4** You will receive a cash compensation for every missed kWh should the system perform less than the guaranteed yield specified in your guarantee certificate.

RISK COMPARISON TABLE

	Product warranty	Panel performance guarantee	Premium kWh guarantee
Brand bankruptcy	✗	✗	✓
Performance loss due to product defect	✗	✗	✓
Performance loss due to lower insolation	✗	✗	✓
Performance loss due to installation defects	✗	✗	✓
Replacement product for product defect	✓	✗	✓
Replacement product when proven lowered solar panel output	✗	✓	✓
Financial compensation for system underperformance	✗	✗	✓

Work together on a better future for all

BE SUSTAINABLE AND BENEFIT FINANCIALLY

Put the roof of your business to work. A customized Autarco solar solution with a guaranteed kWh energy performance assures effective cost savings and maximum independence from energy suppliers and rising electricity costs.

Want to know what working together with us looks like?

DRAMATIC SHIFT
IN PERFORMANCE

BUSINESS CASE CALCULATION

Every rooftop is different. Based on your roof and personal preferences your dealer can make an extensive shade analysis and system design using our integrated software. This is the foundation of their quotation which includes a financial calculation. You'll know exactly when your investment has paid itself back.

INSTALLATION

After you have made the safe decision to purchase an Autarco solution, your dealer will plan a convenient installation date with you. Once the system is operating and monitoring is established he will register the system with us for final due diligence checks before you receive your guarantee certificate.

ASSET MANAGEMENT

After installation we manage your asset and actively monitor system's performance constantly. You can also keep track of performance yourself through the free MyAutarco app and web portal. When we notice a drop in performance we will make sure maintenance is performed, giving you peace of mind that your system is being looked after.

'Smart investments that make your business more sustainable, without worry'

MARCO VISSERS

TIER-1 TECHNOLOGY

Our comprehensive quality management and commitment to constant improvement deliver high quality and reliable products at an affordable price. All Autarco components are developed in-house and work seamlessly together for the best performance.

REAL-TIME INSIGHT

Always have insight into the live performance of your solar energy system with the MyAutarco app. Wherever you are. The Autarco software also helps with periodic KPI reports for you and the controller of the proceeds.
